

VANTINO

Senior .Net Developer

Description

Vantino (Swiss software company based in Kiev and Geneva) is looking for a motivated and experienced .Net Developer to work on several new projects of our client - **Swiss real estate booking platform**. You will be developing integrations with other platforms, such as Booking.com or Airbnb, designing customer feedback management system and develop new backend functionalities.

Technology stack includes, but is not limited to: C#, ASP.NET, Azure Cloud environment, Microsoft SQL Server, Cloud APIs, HTML, CSS, Javascript.

Responsibilities

- You would be expected to work with server-side components, producing stable and performant code.
- You will be involved in all phases of the development process, and your tasks will include requirements review, design, coding and writing unit tests.
- You are expected to work in a close cooperation with our Swiss client.

Required

- Minimum of 3 years of commercial experience in C# and .NET Web development
- Strong experience with Azure Cloud environment and Cloud APIs
- Experience with Microsoft SQL Server
- Experience with HTML, CSS, Javascript
- English - spoken and written

Would be a Plus

- Experience with Javascript frameworks (React, Node.js)
- Good practical knowledge of HTML and CSS

Benefits

- Friendly and collaborative team spirit
- Free English courses
- Competitive salary with regular reviews 2 times per year
- Swiss corporate standards

- Comfortable office in Kiev center (5 minutes walk from Olympiyska metro station)
