

VANTINO

Senior/Middle Frontend Developer

DESCRIPTION

Vantino - (Swiss software company based in Kiev and Geneva) is looking for a motivated and experienced Frontend Developer to work on a bunch of interesting projects. We're building and supporting a number of projects with different complexity – from client portals to full-blown capital markets trading applications. Technology stack includes, but not limited to: React + libs (redux, redux-saga, mobX, etc). We do believe in typed code and hence TypeScript is our choice.

Responsibilities

- Create single page applications (mainly via React)
- Not be afraid of markup from time to time (design is provided in Zeplin)
- Team-player – standups, planning, review
- Think of quality every time you press commit

Required

- Deep knowledge of HTML/CSS, including techniques and best practices
- Deep knowledge of JS (experience in ES+)
- TypeScript and React hands on experience
- Experience in CSS preprocessors (stylus, scss)
- English – spoken and written

Would be a Plus

- Experience in css-modules and css-in-js
- Understanding of unit and automated functional testing
- Linux sysadmin skills
- Functional practices: ADT (Algebraic data types), HKT (Higher kinded types)
- Experience in fp-ts

Benefits

- Friendly and collaborative team spirit
- Free English courses
- Competitive salary with regular reviews 2 times per year
- Swiss corporate standards
- Comfortable office in Kiev center (5 minutes walk from Olympiyska metro station)
